

**Dave Harper, M.Sc., P.Geo.**  
**Managing Partner**  
**Kilmer Brownfield Management Limited**

---

Mr. Harper is a Managing Partner in Kilmer Brownfield Management Limited, a Canadian investment group managing a specialized private equity fund whose focus is the redevelopment of Brownfield sites in Canada. His primary role is to quantify the environmental risks associated with Brownfield opportunities and integrate site remedial strategies with site re-development and finance. Mr. Harper practices as a “qualified person” and is a panel advisor to the Canadian Brownfield Network (CBN). He actively participates in various Brownfield awareness initiatives, both nationally and internationally.

Mr. Harper’s previous experience includes 12 years as an environmental consultant with specialized expertise in Brownfield remediation, project management and business operations. Mr. Harper was formerly the National Brownfield Practice Leader for Jacques Whitford Limited where he directed the integration of complex environmental considerations with Brownfield evaluation and project implementation. He is familiar with the many challenges commonly associated in Brownfield revitalization and the various perspectives of both public and private stakeholders.

Mr. Harper was also responsible for expanding the presence of Jacques Whitford in the greater Toronto area. Over a five year period the consulting practice grew from a handful of specialists to a network of multi-disciplinary professionals at one of the most profitable locations within the Jacques Whitford organization.
