

Bio – 2005 update

**Kevan van Velzen, M.Sc. P.Biol.**

Kevan extensive experience in the field of Environment and Management and is a graduate of the Master of Science and Management from the Royal Roads University, British Columbia.

His background since 1989 includes being an environmental consultant in the British Columbia, conducting baseline organo-chlorine studies for Health Canada and Environment Canada, and overseeing the Environmental Operations at Winnipeg International Airport. He was the Base Environmental Officer at the former Canadian Forces Base Calgary, responsible all environmental issues including investigation and remediation of the entire Base during closure and decommissioning.

Kevan is currently the manager of the Environmental Assessment & Liabilities division of Environmental Management, City of Calgary. He responsible for management of contamination issues as both the property owner and approving authority along with development and management of environmental assessments for City projects. His duties have recently expanded to include creation and implementation of a Brownfields redevelopment strategy for the City of Calgary.
